

Studebaker Building

Façade Repairs and Roof Replacement

Construction Activities for the Next Two Weeks

Columbia University is performing exterior repairs at the Studebaker Building. The first phase of the project is focusing on façade repairs to address deteriorating conditions of terra cotta and ensure safety, including terra cotta replacement, parapet reconstruction, and masonry repairs. After completion of the façade repairs, the building's roof will be replaced. This project is estimated to be complete in August 2024.

Construction Activities for the Weeks of November 14, 2022 and November 21, 2022

Although contractors carefully stage construction activities to minimize disruption, the nature of construction work is such that some disruptions will occur. The community should expect the following in the coming weeks:

What is Happening

- Hanging scaffolding will be installed on the south elevation for window caulking replacement and lintel painting. Work is mostly quiet, but the crew will be working directly outside the windows. This work will continue for approximately 3-4 weeks.
- Parapet demolition and rebuilding will continue at the elevator tower for approximately 3-4 weeks. Work will create heavy drilling noise and vibration for one week and then will be mostly quiet.
- Terra cotta repairs will continue at the north and west parapet wall. Work is mostly quiet but occasional drilling is expected, mainly on the 6th floor.
- East elevation stucco installation will continue for the next 2-3 weeks, weather permitting. Work is mostly quiet.

What to Expect

- Regular work hours are 7:00 a.m. to 5:00 p.m. Monday through Friday. Work that creates noise and vibration is currently limited to Monday, Thursday and Friday from 7:00 a.m. to 5:00 p.m., and Tuesday and Wednesday from 7:00 a.m. to 9:00 a.m.
- Work is suspended on Thursday, November 24 for the Thanksgiving Holiday.
- Expect high levels of noise where and when demolition is taking place. Please note that during quieter workdays there will be some occasional noise.
- Windows should remain closed to prevent construction dust from entering the building. Draw shades for privacy during the workday.

-Please note that all activities are subject to change based on field conditions –

Need More Information?

You can find more information about the Studebaker exterior repairs on our website at cufo.columbia.edu/studebaker-facade-roof. Should you have any questions or concerns about this project, please call the Columbia University Facilities Services Center at (212) 854-2222 24 hours a day, seven days a week, or e-mail projx@columbia.edu (emails responded to during normal business hours).
