

Studebaker Building

Façade Repairs and Roof Replacement

Construction Activities for the Next Two Weeks

Columbia University is performing exterior repairs at the Studebaker Building. The first phase of the project is focusing on façade repairs to address deteriorating conditions of terra cotta and ensure safety, including terra cotta replacement, parapet reconstruction, and masonry repairs. After completion of the façade repairs, the building's roof will be replaced. This project is estimated to be complete in Spring 2024.

Construction Activities for the Weeks of March 4, 2024 and March 11, 2024

Although contractors carefully stage construction activities to minimize disruption, the nature of construction work is such that some disruptions will occur. The community should expect the following in the coming weeks:

What is Happening

- Roof installation around the elevator tower will continue and is expected to be completed by Friday, March 8. This work is mostly quiet.
- The terra cotta installation at the ground level will commence at both street elevations. This work continues until the project's completion, estimated for June 2024. Expect medium to high levels of intermittent drilling noise. This noise will be more noticeable on the lower floors.

What to Expect

- Regular work hours are 7:00 a.m. to 5:00 p.m. Monday through Friday.
- Building occupants should expect intermittent noise, drilling, vibration, and other impacts typically associated with construction during the current phase of the project.
- Windows should remain closed to prevent construction dust from entering the building. Draw shades for privacy during the workday.

-Please note that all activities are subject to change based on field conditions –
