

Studebaker Building

Façade Repairs and Roof Replacement

Construction Activities for the Next Two Weeks

Columbia University is performing exterior repairs at the Studebaker Building. The first phase of the project is focusing on façade repairs to address deteriorating conditions of terra cotta and ensure safety, including terra cotta replacement, parapet reconstruction, and masonry repairs. After completion of the façade repairs, the building's roof will be replaced.

Construction Activities for the Weeks of July 22, 2024 and July 29, 2024

Although contractors carefully stage construction activities to minimize disruption, the nature of construction work is such that some disruptions will occur. The community should expect the following in the coming weeks:

What is Happening

- The facade project is on hold while the contractor waits for additional stone units to arrive. The work will resume when the last of the remaining shipments is delivered around mid-August, a month later than previously stated. A few stone units did not pass quality control and needed to be remade.
- The estimated completion is now early October 2024.

What to Expect

- No construction activities for the next two to four weeks.

-Please note that all activities are subject to change based on field conditions –

Need More Information?

You can find more information about the Studebaker exterior repairs on our website at cufo.columbia.edu/studebaker-facade-roof. Should you have any questions or concerns about this project, please call the Columbia University Facilities Services Center at (212) 854-2222 24 hours a day, seven days a week, or e-mail projx@columbia.edu (emails responded to during normal business hours).
