

CZ Biohub New York

Studebaker Sixth Floor

Laboratory Renovations

Columbia University is performing renovations on the sixth floor of the Studebaker Building to create a state-of-the-art research space for the Chan Zuckerberg Biohub New York. The CZ Biohub New York is a collaborative effort among scientists from Columbia University, The Rockefeller University, and Yale University to bioengineer immune cells for the early detection and treatment of diseases. In addition to the renovation work on the sixth floor, the third and fourth floors will be refreshed.

Construction Activities for the Weeks of March 23, 2026 and March 30, 2026

Although contractors carefully stage construction activities to minimize disruption, the nature of construction work is such that some disruptions will occur. The community should expect the following in the coming weeks:

What is Happening

- Furniture and cubicles are being delivered and installed
- Mechanical penthouse work is continuing
- Casework/millwork installation is ongoing
- Millwork installation is continuing on the 6th floor
- Interior glass office partitions framing is complete; survey for the glass is proceeding
- Miscellaneous equipment picks from the empty lot to east of the building will occur during the next few weeks
- Testing of mechanical systems is continuing throughout the building on various floors

-Please note that all activities are subject to change-

What to Expect

- Regular work hours are 7:00 a.m. to 5:00 p.m., with after-hours work performed as needed.
- Expect noise and other impacts typically associated with construction projects.
- Material deliveries and trash load out through the loading dock and the freight elevator.
- Increased personnel traffic within the building on the 6th floor, and on the lower floors as needed.
- Increased material deliveries for the project to be expected.
